World leader in compact articulated wheel loaders. Schäffer, marks the beginning of its U.S. 2021 trade show season with the Texas Nursery / Landscape Association (TNLA) Expo.

DFD Loaders, Inc., exclusive U.S. distributor of the construction equipment line will exhibit at booth #3043

August 3, 2021 CORAL SPRINGS, FL: DFD Loaders, Inc. will be showcasing two of its 17 models from the Schäffer line (which has a 65-year history of innovation and distribution in nearly 50 countries) at the TNLA Expo, August 5-7, 2021 at the Henry B. González Convention Center.

The two models on exhibit will be the 2428 SLT, which is the only 25 hp articulated wheel loader in the market that can fit through a 36" gate (with optional configuration) and lift 3,000 lbs., and the 4670 T, a 66 hp telescopic wheel loader with a tipping load of more than 4,500 lbs with a pallet fork.

DFD Loaders announced its exclusive U.S. distribution partnership with Schäffer in 2018, when it introduced the brand's construction equipment to the U.S. market, and has since enjoyed a high level of interest and acceptance in the growing compact articulated wheel loader space — particularly in the landscape, tree care, nursery, and construction industries. The company attributes its early success to Schäffer's global reputation, its products' superior German engineering, and a commitment to exceptional white-glove level service.

"Our strategic partnership was created to truly offer the customer the best of both worlds: exceptional American service and distribution, and superior German engineering," said David Font, President and CEO of DFD Loaders.

Besides this year's TNLA Expo in San Antonio, DFD Loaders is scheduled to exhibit at the Florida Nursery, Growers and Landscape Association's (FNGLA) Landscape show in Orlando, FL (August 25 - 27), as well as the GIE+EXPO in Louisville, KY (October 20 - 22), and the TCI EXPO in Indianapolis, IN (November 4 - 6).

Designed to meet the needs of the nursery, landscape, tree care, construction, and snow removal industries, among others, Schäffer's entire U.S. product lineup meets EPA Tier 4 Final/EU Stage V emission standards and is compatible with most skid steer attachments, due to a universal quick-connect headstock in most models.

About DFD Loaders, Inc.

Headquartered in Coral Springs, FL, Schäffer's U.S. partner, DFD Loaders, is the exclusive importer and distributor of Schäffer construction equipment in the U.S. DFD Loaders joins a distribution network of nearly 50 countries, with 17 model lineup that range in size and power capacity (25 to 204 hp). Currently, DFD Loaders sells the Schäffer line direct to consumer, as well as through a growing network of dealers. For more information, please visit www.DFDLoaders.com
